

Mi Electric Scooter Essential

- Sleek and elegant, portable and safe
Minimalist design, aircraft-grade aluminum alloy for the main body. Takes only 3 seconds to fold and go. 12 kg.
- Sophisticated cruise control and kinetic energy recovery system (KERS)
The KERS recovers a moving vehicle's kinetic energy under braking for longer duration. The cruise control system helps maintain a steady speed set by the driver to relieve drivers from constant pressure and tension.
- High quality batteries guarantee a riding distance up to 20km
Forty 18650 li-ion cells offer altogether a high capacity of 183Wh. Smart battery management system (BMS).
- Dual braking system
Outfitted with regenerative and disc braking at rear wheel, E-ABS system at front wheel.
- Skid-resistant and shock-absorbing pneumatic tires
8.5 inch pneumatic tires effectively absorb shocks and prevent slipping. The 250W brushless DC motor powers the scooter to ride with ease and comfort.
- Connects to Mi Home App
Check the riding speed and remaining power in real time after pairing your scooter through Bluetooth with your phone.

Specifications:

Weight:	12KG
Dimensions :	1080x430x1140mm
Dimensions Folding:	1080x430x490mm
Screen:	LED with Speed/Battery/KM/Mode
Motor Power:	250W
Climbing Angle:	10%
Max Speed:	20km/h
Braking Distance:	7.35m
Capacity Battery:	5100mAh 187Wh
Travel Distance:	20KM
Compatible with:	Android 4.3 or iOS 9.0 and above
Wireless Connectivity:	Bluetooth 4.1 BLE and above
